• **Summary**

---

○ Purpose

- Systematic collection of information on the trend of relevant fields by participating in a large-scale symposium in the Waste Resources Recycling sector and hosting of a meeting on the trend of relevant fields jointly with a related agency (Korea Institute of S&T Evaluation and Planning) and joint collection of materials.

○ Schedule: Nov. 26, 2011 (Saturday) ~ Dec. 2, 2011 (Friday), 7 days and 6 nights

※ Symposium Schedule: Nov. 27, 2011 (Sunday) ~ Dec. 1, 2011 (Thursday)

○ Place: Cancún, Mexico

○ Symposium Title: FRAY International Symposium

○ Official in Charge: Koh, Il-won (senior researcher at Green Technology Strategy Planning Office of Korea Environmental Industry & Technology Institute)

○ Participating Companion and Agency: Oh, Hyeon-hwan, researcher (Korea Institute of S&T Evaluation and Planning)

○ Implementation Contents: Investigation into Issues related to Resources Recirculation in the Materials and Metals Sector and Trend of the Technology and Industry

- (Joint Investigation) Status of foreign technologies and industries in the environment and resources sector of national science & technology and joint development of issues related to R&D investment.

(Joint cooperation between Korea Environmental Industry & Technology Institute and Korea Institute of S&T Evaluation and Planning)

- (Project Management) Investigation into materials of resource recirculation technology (Korea Environmental Industry & Technology Institute) which is a typical green technology related to promotion tasks of Global Top Environmental Technology Development Project (R&D Center for Valuable Recycling)
